FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF COLORADO

Active Ingredient:

Keep Out of Reach of Children CAUTION

Harmful if Swallowed.
Read additional precautionary statements below.

EPA SLN. No. CO-060010 EPA Est. No. 72500-CO-1 Expiration Date: March 15, 2009

PRECAUTIONARY STATEMENTS HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION

Harmful if absorbed through skin. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Wear long sleeved shirt and long pants, socks and shoes, and chemical-resistant gloves (such as or made out of any waterproof material, selection category A). Wash thoroughly with soap and warm water after handling. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet.

FIRST AID

If on Skin or Clothing: Take off contaminated clothing. Immediately rinse skin with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If in Eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor or going for treatment. You may also contact the National Poison Information Center at 1-800-858-7378 for emergency medical treatment information.

NOTE TO PHYSICIAN AND VETERINAR-

IAN: This product reduces the clotting ability of the blood and may cause hemorrhaging. If ingested, administer Vitamin K1 intramuscularly or orally as indicated for bishydroxycourmarin overdoses. For human cases, Vitamin K1 is antidotal at doses of 10-20 mg total (not mg/kg). For animal cases, Vitamin K1 is antidotal at 2-5 mg/kg. Repeated doses may need to be given, based upon monitoring of prothrombin times. In severe cases, blood transfusion may be necessary.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, birds and other wildlife. Do not apply directly to water, to areas where surface water is present or to intertidal areas below the mean high water mark.

ENDANGERED SPECIES CONSIDERATIONS

Do not use this product within prairie dog towns within the range of the black-footed ferret without first contacting endangered species specialists, U. S. Fish and Wildlife Service (Colorado Field Office): 303-236-4773.

Notice of Warranty: To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning use of this product other than indicated on the label. Buyer and/or User assume all risks of use and/or handling of this material when such use and/or handling is contrary to label instructions.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This label must be in the user's possession at the time of application of this product.

READ THIS LABEL: Read this entire label and follow all use directions and use precautions.

IMPORTANT: Do not expose children, pets, domesticated animals, or non-target wildlife to rodenticides. To help prevent accidents:

- 1. Store product not in use in locations out of reach of children, pets, domesticated animals, and wildlife.
- 2. Apply this product only as specified on this label.
- 3. Dispose of product container, and unused, spoiled, or recoverable unconsumed bait as specified on this label.

USE RESTRICTIONS: This product may only be used in below-ground, manual applications to control black-tailed prairie dogs (*Cynomys ludovicianus*) on rangeland and noncrop areas in Colorado in these counties only: Adams, Arapahoe, Baca, Bent, Boulder, Broomfield, Cheyenne, Crowley, Denver, Douglas, El Paso, Elbert, Huerfano, Jefferson, Kiowa, Kit Carson, Larimer, Las Animas, Lincoln, Logan, Morgan, Otero, Phillips, Prowers, Pueblo, Sedgwick, Washington, Weld, and Yuma.

- Do not apply this bait at or above ground level.
- Kaput-D Prairie Dog Bait must be applied at least 6 inches down active black-tailed prairie dog burrows
- This bait may only be applied between November 1 and March 15 of the following year, prior to spring green-up of vegetation.
- Wear protective, chemical-resistant gloves when handling bait or animal carcasses.
 Store this product out of reach of and away from
- humans, domesticated animals, pets, and wildlife.
- Do not allow young children, pets, domesticated animals, or persons not associated with the application to be in areas where the bait is being applied.
- Keep livestock, pets, and children out of treated areas until at least three weeks have passed since the last application, or longer if bait is still present.

SITE ASSESSMENT: Before applying this product, observe the area to identify active prairie dog burrows. The openings of active burrows generally will be free of leaves, spider webs, seeds, and other debris, and will have freshly turned earth and prairie dogs' feces nearby. Live prairie dogs often will be observed at or near active burrow openings.

FIRST BAIT APPLICATION: Apply ¼ cup of bait (approximately 2 ounces or 57 grams) of Kaput-D Prairie Dog bait at least 6 inches down into each active prairie dog burrow. LEAVE NO BAIT ON THE SURFACE SOIL. Treat all active burrow openings within the prairie dog town, or colony. Collect and properly apply or dispose of all bait that is spilled above ground or less than 6 inches down into the prairie dog burrow. After treatment, collect and properly dispose of any bait that may have come up to or within 6 inches of the soil surface.

SURVEILLANCE AND FOLLOW-UP: Dead prairie dogs should begin to appear in or near treated areas within 4 to 5 days of the first treatment. However, applicators must return to the treated site within 2 days after bait application and at intervals of 1 or 2

days thereafter to collect and properly dispose of any bait or dead or dying prairie dogs found on the surface. Dispatch moribund prairie dogs before collecting them. Collect all carcasses found above ground or in burrow openings and properly dispose of the carcasses. Dead animals buried on site must be buried a minimum of 18 inches below the ground surface, preferably deeper. Continue to collect and dispose of dead or dying prairie dogs and search for non-target animals for at least two weeks after the last bait application, or longer if carcasses still are being found at that time. Carcass collection and burial should be performed in the late afternoon, near sundown, to reduce the potential for nocturnal scavengers or predators to find carcasses on the ground surface. Deaths of any animals other than prairie dogs must be reported to the Colorado Department of Agriculture by calling (303)-239-4147.

SECOND BAIT APPLICATION: If prairie dog activity persists 3 to 4 weeks after the first application, a second bait application may be made. The second application may be made 1 to 2 months after the first but must be made before March 15. For the second application, treat active prairie dog burrows in the manner prescribed above for the FIRST BAIT APPLICATION. Following the second application, follow the procedures for SURVEILLANCE AND FOLLOW-UP that are stipulated above.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

Pesticide Storage: Store in original container in a dry place inaccessible to children and pets.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste facility.

Container Disposal: Non-Household Use Disposal - Dispose of empty container in a sanitary landfill or if allowed by State and Local Authorities, by burning. If burned, stay out of the smoke. IF EMPTY: Do not reuse this container. Place in trash or offer for recycling if available. IF PARTIALLY FILLED: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.
